EDUCATION

University of Nevada, Las Vegas
Bachelor in Computer Science

Expected Graduation December 2025

SKILLS

Languages	C++, C#, Javascript/HTML/CSS, Python, SQL
Frameworks/Libraries	Django, Node, React, Vue, BeautifulSoup
Tools	Postman, Git, Github, Trello, Figma

PROFESSIONAL EXPERIENCE

i.c.stars

Jan 2024 - May 2024

Project Manager Intern | *Vue.js, Django, MySQL, Postman*

- Created a full-stack talent catalog for Pfizer's Request for Proposal (RFP), visualizing ~88,000 employees that manage team connections, roles, and projects for improved collaboration and tracking
- Managed a team of four by leading daily scrum meetings, create user stories, and effectively delegating tasks to ensure high-quality results and project adherence to scope
- Collaborated with Product Owner and Pfizer employees to capture end-user requirements, aligning product development with customer needs
- Conducted post-project reviews to identify successes, areas for improvement, and best practices for future projects and utilized monitoring tools such as Trello to track project progress

Software Development Intern | *HTML, CSS, JavaScript, Python, SQL, Vue.js, Django, Node.js, MySQL*

- Acquired comprehensive full-stack web development skills through mentorship and networking with industry professionals, encompassing frontend, scripting languages, and databases
- Developed data model, database, and Django REST API that integrates with Pfizer's existing tools to enable automation and data availability

Code Ninjas

Jul 2023 - Jan 2024

Coding Tutor | *JavaScript*

- Directed and held coding tutoring sessions with cohorts of up to 20 students daily through one-on-one guidance to improve their understanding and proficiency in JavaScript programming concepts
- Facilitated the development of interactive games with an emphasis in object-oriented programming

Fortem International

Jun 2021 - Jun 2022

Data Marketing Manager | *Python, HTML, Excel*

- Engineered web scraping scripts to extract business names and contact information, improving marketing operations and data accessibility
- Enabled company growth by coordinating a 6-person team and external call centers to leverage the collected data

PROJECTS

DND Character Sheet | *Vue.js, DND 5E API*

- Prototyped a web application to automate the Dungeons & Dragons character sheet creation, tracking ability scores, race, class, equipment, and spells, streamlining the process and eliminating the need to reference the player handbook

Web Scraper | *Python, HTML*

- Programmed a web scraper utilizing BeautifulSoup to extract information on businesses such as names, addresses, and contact information, and the price of products
- Designed and optimized the web scraper to efficiently scrape hundreds of pages and export to files

Discord Bot | *Python, Discord API & other API, Heroku*

- Deployed a Discord bot that emulates a Magic 8 Ball and integrated responses from 8Ball API, providing personalized answers based on user input
- Leveraged Heroku to host and Github to deploy the bot and guarantee continuous, 24/7 availability and functionality

myManhwa List | *JavaScript, NodeJS, HTML, MongoDB*

- Developed a web service enabling users to search for manhwa titles, integrating backend functionality to search multiple sites and aggregate links for streamlined manhwa discovery
